How to Find Your Child's Shoe Size

1. Place your child's heel along the solid line at the base of the chart.
2. Make sure your child's weight is on the foot being measured and his or her toes are relaxed.
3. Determine the correct size based on the line that touches his or her longest toe.
4. Tip! Measure both of your child's feet as one foot is often larger than the other. If each foot measures a different size you should purchase the larger size.
